Way of Life!

**Get up. Get out. Make the day your own.
No more waiting. No more excuses.
No more 'ifs' or 'buts' or 'maybes'.
Be spontaneous. Be original. Be yourself.
Get up. Get out. The whole world is
waiting for you.**

With new updates added to an already successful design, the Suzuki Swift is always ready to take on a new day. Available with a choice of engines, lots of features, a wide range of colours, all it needs is a driver with the same attitude to life.

Adrenalin begins to rush. Eyes start to widen. Lips begin to smile.

With bags of character, the new Swift can enchant any urban jungle. It's something to do with the funky good looks and sporty front face that incorporates clear headlamps and a wide airdam. This airdam not only helps the car hug the road, but it also accentuates the sporty look of the car. Then there are the large diameter wheels positioned as close to each corner as possible, conveying a strong sense of stability. It's a truly iconic look and one that doesn't pass unnoticed. Heads will turn. Hearts will beat. Lips will smile.

Muscular flared wheel arches, bold sills and a sports-influenced design means the Swift is perfectly packaged for the city.

Exterior style: Daily beauty regime. Get in. Drive away.

With cars, as with life, it's the little things that make you feel good - especially those additional sporty touches. Wraparound glass add to the dynamic styling and all round visibility. Boldly flared wheel arches and side sills convey a strong sense of stability, whilst rear combination lamps curve forward over the arches to create a uniquely solid and sporty design. The whole look is one of a high energy car raring to have its power released, whether heading for a quick lunch with friends, or a spot of retail therapy.

 Exhilarating looks, an eye-catching design and loads of excitement from the headlights to the taillights.

Big urban boulevards. Cobbled back streets. Tight city centre car parks. The new Swift is equipped to match whatever life throws at you.

Our engineers have developed a new chassis design for a variety of road conditions. A chassis refined through hundreds of thousands of hours on both test bed and road testing across different types of terrains. The result is precise, dynamic handling - and that means a lot more fun and enjoyment behind the wheel.

This enjoyment is enhanced by a choice of transmissions and power assisted steering with a new steering gearbox delivering a more direct feel. There's also an upgraded braking system to bring you to a halt faster and safer.

Electric controlled power steering means you're always in touch with the road. Or track, or lane, or back street...

The 5-speed manual transmission features firm and quick gear shift. And the 4-speed automatic has a gated shift lever for added exhilaration.

The Swift engine range: exciting, energetic and ready for anything. Sound familiar?

The new Swift is not only sporty to look at, it offers a choice of two great new high performing engines: a 1.3 and 1.5 litre petrol engines comprehensively upgraded to deliver performance tuned to low and mid-range speeds.

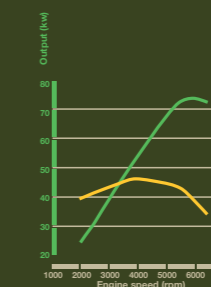

The 1.5 model has the latest VVT (Variable Valve Timing) technology to maximise power and torque across the rev range. Transmissions available are a 5-speed Manual, and a 4-speed Automatic. The new Swift also has torsion-beam rear suspension for appropriate balance between performance and comfort.

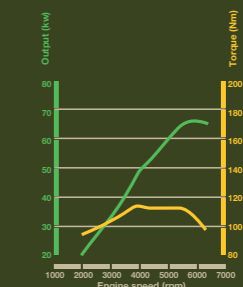

A 5-speed transmission delivers effortless progress even at the lowest engine speeds.

A great choice of engines combine maximum performance with minimum running costs.

Optimum efficiency, abundant torque and strong acceleration, make this an engine tuned exclusively for the Swift.

M15A

M13A

With easy to use buttons, switches and steering wheel mounted controls, your hands never have to leave the wheel.

Centre console storage, cup-holders, front and side door pockets and more than enough space for your road atlas, your cappuccino and anything else you just can't do without.

A seamlessly integrated radio/CD player gives you a seamlessly integrated soundtrack to your journey.

Interior style:
Surround yourself with comfort. Or shopping, or friends, or music...

Inside the new Swift every detail is designed for pure driving pleasure, from the sporty three-spoke steering wheel and tactile gear shift knob to the illuminated ring round the speedometer. The instrument panel is positioned for an unimpeded view over the bonnet whilst the high fidelity combined audio and climate system has large, easy to use dial controls. There are even additional steering wheel controls for added convenience and clever storage pods all around, including a large centre console and CD player controls.

Everyone needs to find their own space. And the new Swift has more than enough.

If getting out and seeing the world is a big part of your life, the new Swift has a big part to play. Even with all seats in use the luggage area offers easily enough space for a large suitcase or a full load of shopping. Take just one friend, and with the rear seats down, that space more than doubles.

For those small but essential items, you'll find a compartment in the instrument panel, a glove box, front and rear bottle holders, a seatback pocket, front door pockets and a tray under the front passenger seat.

 Controls. Positioned for intuitive touch, designed for confident use and developed for great driving.

 Air conditioning with large dials for comfort and control.

 The foldable rear seatback gives you extra space whenever you need it, providing plenty of luggage capacity.

 Ease of entry. Simply access the car at the touch of a button.

 The Swift interior is designed around you; space, sophistication and loads of great design features.

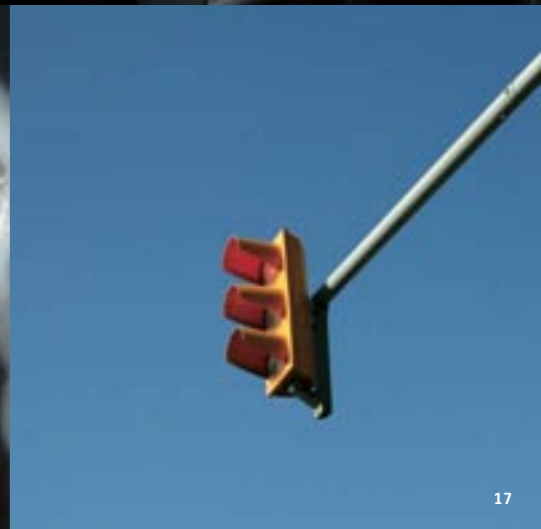

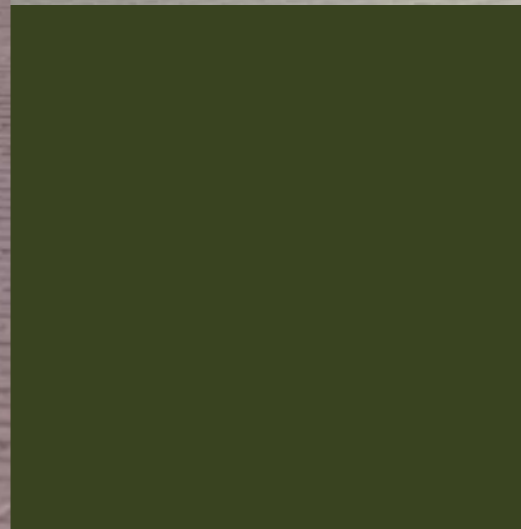

You take care of the adventure. We take care of everything else.

Big city life. Not only is it crammed full of fun and excitement, it's also crammed with traffic and hazards. These days safety measures have to take in all considerations, and the new Swift delivers in spades. ABS with EBD (Electronic Brake Distribution) delivers a good balance of braking power to both the front and rear wheels (dependent on the number of occupants and loading conditions). Then there are SRS front airbags, crumple zones, pre-tensioners and ISOFIX child seat attachments. Even pedestrians are taken into consideration with crushable and impact-absorbing bonnet and front bumper.

 With SRS front airbags, the Swift is designed for occupant safety.

Go shopping. Go clubbing. Go for a nice relaxing massage. Go to the places you always dreamed of. Go with the people you've always wanted to take. Go large. Go wild. Go now. The clock is ticking, make the most of every second.
